Subject: Asbestos in OC, Md Apartment

Dear Mr. Bishop,

Firstly, I truly appreciate the time, assistance and care you and your team have provided us as we try to navigate our situation.

In an attempt to summarize my understanding of where we are given the situation going on in our apartment and that there is no known safe level of disturbed friable asbestos exposure, the EPA can not suggest or recommend to us or assure us in any way it is safe to return to our home at this time.

We are undertaking the sampling/testing the EPA has recommended in accordance with the EPA's Guidelines and these results will help dictate the level of clean up necessary before it is safe for our family to return home.

I have received an error message after attempting to send you this email. Please just let me know you received my email, and of course if there are any steps I am missing, please let me know.

Thank you,

(b) (6)
